

**Issue:** Access the NetSHIELD console using a PC and cable.

**Solution:** A USB to USB null modem cable will allow a serial connection from a PC USB port to a USB port on the NetSHIELD appliance.

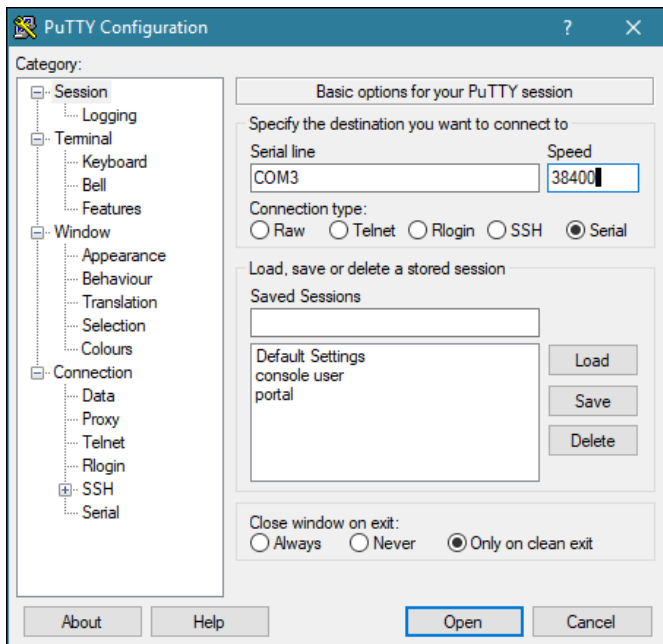

NetSHIELD has been tested with a FTDI Chip brand USB NMC-2.5 m cable.

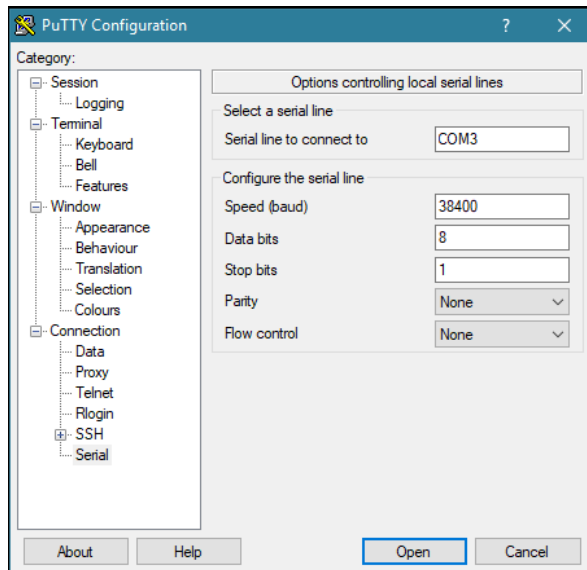

This is available from:

DigiKey - [www.digikey.com](http://www.digikey.com)

Part number 768-1076-ND

1. Connect the cable from a USB port on the PC to a USB port on the NetSHIELD appliance.
2. Use a terminal emulation program such as PuTTY.

3. The COM Port number will depend on the individual PC.
4. Baud rate is 38400, Data-Stop-Parity = 8 - 1 - None
5. Click Open and a terminal screen will display.
6. Hit enter and the password prompt will display.
7. The default password is 'changeme'
