

## Netshield covers the following FFIEC domains as part of a more comprehensive cybersecurity solution

### Cyber Risk Management and Oversight

Assessment Factor:  
Governance

IT Asset Management  
Audit

Automated network access control is vital and a requirement for "Evolving" Cybersecurity Maturity

### Threat Intelligence and Collaboration

Assessment Factor:  
Threat Intelligence

Threat Intelligence  
Monitoring and Analyzing

### Cybersecurity Controls

Assessment Factor:  
Preventative Controls

Infrastructure Management  
Device/Endpoint Security  
Threat and Vulnerability  
Detection  
Anomalous Activity Detection  
(via 3rd party integrations)  
Event Detection - IPS  
Response and Mitigation

### About Netshield Corporation

Netshield is a trusted provider of proven cybersecurity solutions that are designed to be cost effective and manageable for smaller and mid-sized enterprises.

Our devices deliver critical network access control that ensures only trusted assets can enter your network – rogue devices are blocked. Netshield also protects against zero-day malware and phishing attacks with real-time quarantine, mac-spoof detection, and TLD blocking. Finally, comprehensive auditing, vulnerability assessments, and compliance reporting and enforcement make Netshield an integral part to a comprehensive cybersecurity solution.
