

Issue: Access the Netshield console using a PC and cable.

Solution: A USB to USB null modem cable will allow a serial connection from a PC USB port to a USB port on the Netshield appliance.

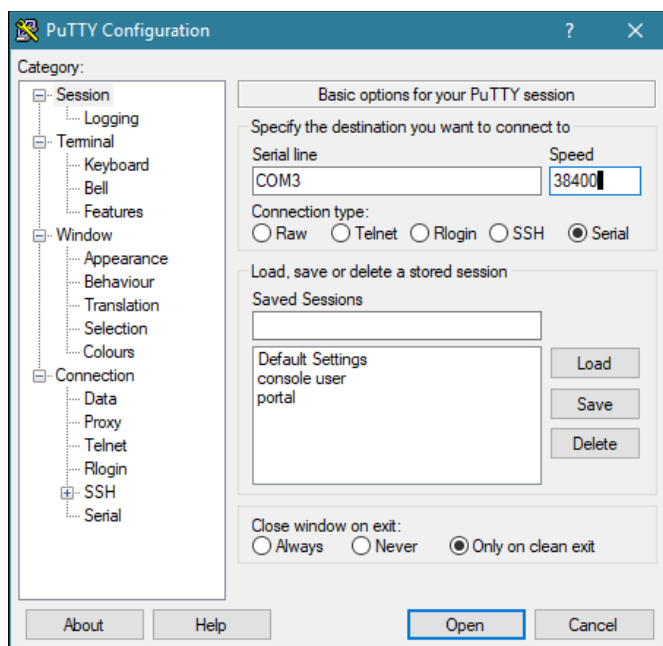

Netshield has been tested with a FTDI Chip brand USB NMC-2.5 m cable.

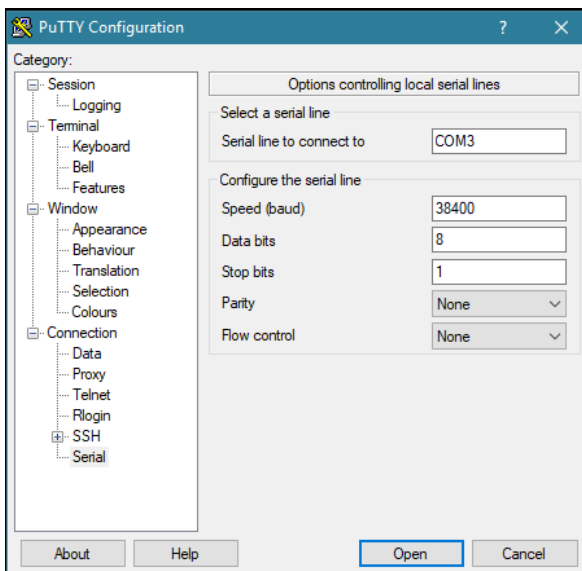

This is available from:

DigiKey - www.digikey.com

Part number 768-1076-ND

1. Connect the cable from a USB port on the PC to a USB port on the Netshield appliance.
2. Use a terminal emulation program such as PuTTY.

3. The COM Port number will depend on the individual PC.
4. Baud rate is 38400, Data-Stop-Parity = 8 - 1 - None
5. Click Open and a terminal screen will display.
6. Hit enter and the password prompt will display.
7. The default password is 'changeme'
